

Protecting Children in Your Home: The Facts

Top Tips for a Safe Home

- Give young children your full and undivided attention when they are in the bathtub or around water.
- Check smoke alarm batteries every six months to make sure they are working.
- Keep cribs clear of objects, and make sure babies sleep alone, on their backs, and in a crib every time they sleep.
- Install safety gates to keep children from falling down staircases and window guards or stops to prevent falls from windows.
- Keep all medicine up and away, even medicine you take every day. Be alert to medicine stored in other locations, like pills in purses, vitamins on counters, and medicine on nightstands.
