Safe Kids is committed to keeping you informed about recalls of products that can put kids at risk. The Safe Kids’ recall center is a unique place where parents and caregivers can go to stay up to date on recalls of all child-related products. This report includes multiple types of helmets failing to meet federal safety standards as well as magnet products that pose a risk of severe injury or death if ingested.

  Potential foreign material contamination; FDA

- **Skippy Assorted Peanut Butter Products**
  May contain small fragments of stainless steel; FDA

- **Kinder Assorted Chocolate Products**
  Salmonella; FDA
TOP RECALLS

March 31, 2022 CPSC; Universal Security Instruments recalled its 2-in-1 Photoelectric Smoke & Fire + Carbon Monoxide Alarms because the alarms fail to alert consumers to the presence of hazardous levels of carbon monoxide, posing a risk of carbon monoxide poisoning or death. Units: About 8,000.

March 24, 2022 CPSC; Sakar International recalled its Dimensions Bluetooth Speaker Helmets because they do not comply with federal safety standards, posing a risk of head injury. Units: About 89,000 (an additional 272 in Canada)

March 17, 2022 CPSC; HD Premier recalled its DigitDots Magnetic Balls because if two or more magnets are swallowed, either intentionally or accidentally, the magnets can attract to each other, or to another metal object, and become lodged in the digestive system. This can cause perforations, twisting and/or blockage of the intestines, infection, blood poisoning, and death. Units: About 119,620.

March 17, 2022 CPSC; Acme United Corporation recalled PhysiciansCare brand over-the-counter products containing aspirin, acetaminophen, or ibuprofen because the packaging is not child-resistant, posing a risk of poisoning if the contents are swallowed by young children. Units: About 165,000.

March 16, 2022 CPSC; Maison Batta recalled its B. toys Walk ‘n’ Learn Wooden Activity Walker because the wheels and wheel attachment hardware can detach from the walker in small pieces, posing a choking hazard to young children. Units: About 17,200 (an additional ~2,400 in Canada).

RECALLS

April 7, 2022 CPSC; biOrigins recalled its sodium hydroxide products because their packaging is not child resistant, posing a risk of chemical burns and irritation to the skin and eyes. The packaging does not comply with the Poison Prevention Packaging Act and the label violates the Federal Hazardous Substances Act by omitting mandatory information. Units: About 30.

April 7, 2022 CPSC; Bestar recalled its Wall Beds because they can detach from the wall and fall onto those nearby, posing serious impact and crush hazards. Units: About 129,000 (an additional 53,000 in Canada).

April 7, 2022 CPSC; Stokke recalled its Clikk high chairs because the white plastic seat can break, posing fall and injury hazards to children. Units: About 790 (an additional ~48 in Canada).

April 1, 2022 FDA; Best Branded Consumer Products recalled its Disney Hand Sanitizers because FDA testing found the presence of benzene in The Mandalorian hand sanitizers and methanol in the Mickey Mouse hand sanitizers. Substantial exposure to benzene and methanol may cause adverse health effects, with benzene posing a risk for cancer and methanol posing a risk of methanol poisoning if accidentally ingested by young children.
March 31, 2022 CPSC; Universal Security Instruments recalled its 2-in-1 Photoelectric Smoke & Fire + Carbon Monoxide Alarms because the alarms fail to alert consumers to the presence of hazardous levels of carbon monoxide, posing a risk of carbon monoxide poisoning or death. Units: About 8,000.

March 31, 2022 CPSC; PlayMonster recalled its Kid O Hudson Glow Rattles because the rattle’s legs can break off, posing a choking hazard to young children. Units: About 8,900 (an additional ~200 in Canada).

March 24, 2022 CPSC; Sakar International recalled its Dimensions Bluetooth Speaker Helmets because they do not comply with federal safety standards, posing a risk of head injury. Units: About 89,000 (an additional 272 in Canada).

March 24, 2022 CPSC; Segway recalled its Ninebot Children’s Bicycle Helmets because they do not comply with federal safety standards, posing a risk of head injury. Units: About 960.

March 24, 2022 CPSC; EGL Motor recalled its EGL and ACE-branded Youth All-Terrain Vehicles (ATVs) because they fail to comply with federal standards. The B125 ATVs exceed the maximum speed limitations for children aged 10 and under. The Madix 110 ATVs parking brakes do not prevent movement. Both models pose a laceration hazard should the rider experience high speed impact with the handlebars. These ATVs pose a risk of serious injury or death. Units: About 500.

March 24, 2022 CPSC; Commencal recalled its Ramones 14-inch bicycles because they are not equipped with foot brakes and therefore do not meet federal standards, posing a crash hazard to young children who might not be able to stop the bicycles using handbrakes. Units: About 925.

March 24, 2022 CPSC; Boxine U.S. recalled tonies Blocks because if two or more magnets are swallowed, either intentionally or accidentally, the magnets can attract to each other, or to another metal object, and become lodged in the digestive system. This can cause perforations, twisting and/or blockage of the intestines, infection, blood poisoning, and death. Units: About 4,200.

March 17, 2022 CPSC; HD Premier recalled its DigitDots Magnetic Balls because if two or more magnets are swallowed, either intentionally or accidentally, the magnets can attract to each other, or to another metal object, and become lodged in the digestive system. This can cause perforations, twisting and/or blockage of the intestines, infection, blood poisoning, and death. Units: About 119,620.

March 17, 2022 CPSC; Acme United Corporation recalled PhysiciansCare brand over-the-counter products containing aspirin, acetaminophen, or ibuprofen because the packaging is not child-resistant, posing a risk of poisoning if the contents are swallowed by young children. Units: About 165,000.

March 16, 2022 CPSC; Reckitt recalled its Airborne Gummies because when opened for the first time, pressure build up in the bottle can cause the cap and underlying seal to pop off with force, posing an injury hazard. Units: About 3.74
March 16, 2022 CPSC; Maison Batta recalled its B. toys Walk ‘n’ Learn Wooden Activity Walker because the wheels and wheel attachment hardware can detach from the walker in small pieces, posing a choking hazard to young children. Units: About 17,200 (an additional ~2,400 in Canada).

March 16, 2022 CPSC; Specialized Bicycle Components expanded its September 2020 recall to include Sirrus, Sirrus X, and Sirrus Sport Bicycles with alloy cranks because the crank arm can disengage and cause the bicycle’s rider to lose control, posing fall and injury hazards. Units: About 19,000 (an additional 36,000 were recalled in September 2020).

This service collects recalls from the National Highway Traffic Safety Administration, Consumer Product Safety Commission, Food and Drug Administration and Food Safety and Inspection Service. Parents Central at NHTSA’s safercar.gov is a go-to resource on car seats.

A few more reminders:
- Register all new car seats and booster seats. https://go.pardot.com/e/957122/recalls-register-childseat-/2rvjh/63797168?h=V460xBkpW5DzstTBNBzuAq3P4Wwhz2QPjbMSG0KXams
- Be careful about using hand-me-downs or buying children’s products at a secondhand shop or yard sale.
- It violates federal law to sell recalled products. If you know of an unsafe product, you can report it to the CPSC. https://go.pardot.com/e/957122/-Incidents-ReportIncident-aspx/2rvjl/63797168?h=V460xBkpW5DzstTBNBzuAq3P4Wwhz2QPjbMSG0KXams
