July 2023

Safe Kids is committed to keeping you informed about recalls of products that can put kids at risk. The Safe Kids’ recall center is a unique place where parents and caregivers can go to stay up to date on recalls of all child-related products. This report includes Pottery Barn Kids Cribs that pose a laceration hazard to young children.

Chopped Salad Kit
Undeclared milk and egg; FDA

Cava Spicy Hummus
Undeclared sesame allergen; FDA

ANNOUNCEMENTS

CPSC Warns Consumers to Immediately Stop Using These Amazon Bicycle Helmets
The U.S. Consumer Product Safety Commission (CPSC) is warning consumers to immediately stop using the SQM bicycle helmets and the Xinerter teal-colored adult bicycle helmets sold on Amazon because they do not comply with the positional stability and certification requirements of the mandatory federal safety standard for bicycle helmets. These helmets can fail to protect riders in the event of a crash, posing a risk of head injury.

Carolina Milano Magnet Ingestion Hazard
The CPSC warns consumers to immediately stop using Carolina Milano 5mm Magnetic Balls Cubes because the high-powered magnets do not comply with the requirements of the mandatory federal standard for magnets. When swallowed, these loose, hazardous magnets pose a risk of serious injury or death as they can become lodged in the digestive system.

TOP RECALLS
July 20, 2023 CPSC; Pottery Barn Kids recalled its Penny Convertible Cribs because the cribs’ end panel can become loose exposing sharp edges, posing a laceration hazard to children. Unit: About 310.

July 20, 2023 CPSC; Soojimus recalled its CUPKIN Double-Walled Stainless Steel Children’s Cups because they contain levels of lead that exceed the federal lead content ban, posing a risk of adverse health effects to young children. Units: About 346,000.

July 13, 2023 CPSC; ECR International recalled its Gas-fired hot water residential boilers because they could be missing the flue inspection cover plate, posing a risk of exposure to combustion flue gases and a carbon monoxide poisoning hazard. Units: About 1,747.
July 13, 2023 CPSC; Electrolux Group recalled its Frigidaire Gas Laundry Centers because the felt deal on the dryer drum can be folded inward, which can lead to lint accumulation, creating a fire hazard. Units: About 13,600.

July 6, 2023 CPSC; VRURC Portable Chargers exclusively sold on Amazon.com have been recalled because they can ignite, posing a fire hazard. Units: 190,000.

June 29, 2023 CPSC; CaTeam recalled its Canvas Baby Hammock Swings because the inclined sleeper is a banned hazardous product under the Safe Sleep for Babies Act, posing an asphyxiation hazard. Units: About 700.

June 29, 2023 CPSC; Bose recalled its Acoustimass, Lifestyle, and Companion bass modules (produced before April 2006) because the speaker’s electrical components can fail, posing a fire hazard. Units: About 884,000 (an additional ~98,000 in Canada).

RECALLS

July 20, 2023 CPSC; Pottery Barn Kids recalled its Penny Convertible Cribs because the cribs’ end panel can become loose exposing sharp edges, posing a laceration hazard to children. Unit: About 310.

July 20, 2023 CPSC; Soojimus recalled its CUPKIN Double-Walled Stainless Steel Children’s Cups because they contain levels of lead that exceed the federal lead content ban, posing a risk of adverse health effects to young children. Units: About 346,000.

July 20, 2023 CPSC; Salewa USA recalled its Superlight Rocks because when exposed to seaside conditions, corrosion can occur and weaken the cable chocks and they can break, posing a fall hazard to climbers. Units: About 3, 550 (an additional ~225 in Canada).

July 13, 2023 CPSC; ECR International recalled its Gas-fired hot water residential boilers because they could be missing the flue inspection cover plate, posing a risk of exposure to combustion flue gases and a carbon monoxide poisoning hazard. Units: About 1,747.

July 13, 2023 CPSC; Electrolux Group recalled its Frigidaire Gas Laundry Centers because the felt deal on the dryer drum can be folded inward, which can lead to lint accumulation, creating a fire hazard. Units: About 13,600.

**June 29, 2023 CPSC**; Bose recalled its Acoustimass, Lifestyle, and Companion bass modules (produced before April 2006) because the speaker’s electrical components can fail, posing a fire hazard. Units: About 884,000 (an additional 98,000 in Canada).

A few more reminders:

- Register all new car seats and booster seats. [https://go.pardot.com/e/957122/recalls-register-childseat-](https://go.pardot.com/e/957122/recalls-register-childseat-)
Be careful about using hand-me-downs or buying children’s products at a secondhand shop or yard sale.

It violates federal law to sell recalled products. If you know of an unsafe product, you can report it to the CPSC.
